Batteries and Accumulators

Model for Fees Calculation 2020

Fees for 2020

Batteries and Accumulators

Portable and Industrial

The presented fees are the base for calculating annual amounts payable by the Member to ERP Portugal in consideration of the transfer of the responsibility for managing the batteries waste.

The price structure is based on the principle “kilograms placed on market”.

We present the fees table calculated by type and chemical system of waste batteries and accumulators, with effect from January 1, 2020.

Batteries and Accumulators Category	Fees (€/kg)
Portable Batteries and Accumulators	
Alkaline	0,2137
Cell-Button	0,8526
Lead-Acid	0,0100
Lithium Ion	0,2231
Lithium and others	0,7146
NiCd (Nickel - Cadmium)	0,1814
NiMH (Nickel – Metal Hydride)	0,0389
Zinc-Carbon	0,2298
Industrial Batteries and Accumulators	
Lead-Acid	0,0275
NiCd (Nickel - Cadmium)	0,9072
NiMH (Nickel – Metal Hydride)	0,3651
Lithium Ion	1,1451
Others	0,7553

The unit value of the fee for Small Dimension Producers was set at € 75.00 per Member.

All these values will be increased by VAT at the legal rate in force.

Bonifications Criteria to be applied to the Fees

A. Customer loyalty

B. Loyalty by joining more than one specific stream managed by ERP Portugal

C. Members that organize additional prevention and awareness campaigns together with ERP Portugal

D. Forwarding waste of batteries and accumulators to ERP Portugal of at least 100kg per year for recycling.

A. Customer loyalty

This criteria aims to provide the Compliance Scheme with a stable membership base that allows it to make investments in collection networks that are able to meet the imposed targets.

B. Loyalty by joining more than one specific stream

Considering that ERP Portugal manages two specific waste streams and there are synergies in terms of structure costs, namely with regard to IT systems, invoicing, among others, it is important to favor Members that choose to join both streams managed by the ERP Portugal and thus enjoy named synergies.

C. Prevention and Awareness

Campaigns through prevention and awareness, consumption and selective disposal, respectively, more waste will have appropriate disposal.

D. Waste collections

By forwarding waste batteries and accumulators to ERP Portugal, Members ensure their correct recycling routing, also promoting the fulfillment of collection targets.

The bonus criteria to be applied to ERP Portugal's fees table are as follows:

Bonus Criteria	Description	Discount (%)
A	Customer loyalty	2,00%
B	Loyalty by joining more than one specific stream with ERP Portugal	1,00%
C	additional prevention and awareness campaigns with ERP Portugal	1,00%
D	Forwarding waste of batteries and accumulators to ERP Portugal of at least 100kg per year for recycling.	1,00%

Bonuses are not applied to Small Dimension Producers.
